## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 18, 2009 has been entered.

### ***Information Disclosure Statement***

The information disclosure statement submitted on September 18, 2009 has been considered by the examiner and placed of record in the application file.

### ***Examiner's Statement of Reasons for Allowance***

**Claims 1-4, 6, 7, 10-12, 15-20, and 23-37** are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a wireless communication system, method, base station, mobile station, and apparatus for providing a service in a time division duplexing (TDD) mode and a frequency division duplexing (FDD) mode. More specifically, applicants transmit during call setup, a duplexing mode determination factor to a base station, setting a TDD mode or an FDD mode as a reverse mode set by the base station, and setting up a channel for the set reverse mode and a forward channel to perform communication. In addition, applicants designed a base station, during call setup, receiving the duplexing mode determination factor from the mobile station, setting a reverse mode to the TDD mode or the FDD mode using the received duplexing mode determination factor, and setting up a reverse channel for the set mode and a

TDD mode for forward transmission to communicate with the mobile station. Moreover, the base station assigns a frequency resource in a predetermined area among frequency resources available in the base station as reverse link resource in the FDD mode for reverse transmission, and assigns the remaining available frequency resources to the forward link and-a the reverse link in the TDD mode; and wherein the base station sets up a guard time of a predetermined time between switching times of-a the forward link and-a the reverse link in the TDD mode, and assigns time slots beginning at a time slot in an area close to the guard time in order of each mobile station nearest to the base station.

Applicant's independent claim 1, 12, 17, 24, 25, 26, and 35-37 recites, *inter alia*, wherein the base station assigns to the mobile station a channel of a forward link and a reverse link in the TDD mode if the mobile station is located in a close area, and a channel of the forward link in the TDD mode and a channel of the reverse link in the FDD mode if the mobile station is located in a remote area. Johnson, Schafer, Uebayashi, and Barnard substantially disclose the wireless communication system for providing a service in a time division duplexing (TDD) mode and a frequency division duplex (FDD) mode. However, the cited references and a thorough search did not disclose wherein the base station assigns to the mobile station a channel of a forward link and a reverse link in the TDD mode if the mobile station is located in a close area, and a channel of the forward link in the TDD mode and a channel of the reverse link in the FDD mode if the mobile station is located in a remote area. In addition, it would not be obvious to one of ordinary skill in the art even if this particular feature was found as the examiner would be using impermissible hindsight and using applicant's claims and specification as a roadmap. Therefore,

applicant's independent claims comprise a particular combination of elements, which is neither taught nor suggested by the prior art.

Accordingly, applicant's invention is allowed for these reasons and the reasons by applicant in amendments and arguments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
